Mas hot to be Mestaken and the Showed strong Just that the friends of Education, of Which many have yet more field for Maration, he Could rethe bead has mite, and his power of inagmation seemed lost in convenie for When reliting this lesson on the Prantices of the ropes fre would take hold of the fare lopsail halyands of might be and if les alone Would strand Centry over is a whole day without Spelaking a wood, withit reminded the the mate that time was precious he would as from Call is the fit throw Haul as any thing, then there here two Germans Ins of the clistiessed Country of Hossetta, also an Englishman a Futetaman, const a Welchman, condo a Portuguese Certainly a Mixture not often to be met Mith. I watched each Closely to see if I could disenie any great national traits in them, but as nath many when on a strange land they who foreign bristons and it is almost infrassible to trace any frammins trait by which you can disease, his likeage, thus of wearing a monstache the go to France they minediately to speak wiften they manney of then begin to Cultivate one, and our Chew as from as entering in the this, may before that, showed by the day means that they troth to make fresple think they were failers, they trabiling themselves in the red This, Such founts and It as Hat that they hever had traversed Reptunes domains, for the old Leaman When he has returned from a voyage is glad to lose the Eghs of clothes he Had seen livery day for glaw and to him the attraction of the sailors bank these loss lets Charm, though its attractions might have been as great to law on Shis fires Orgage as it is now to his buccessors, but whing

19 8 am 1204 the chess of old falt by the heiner mitiated is hot all They Loon are feen but a filho or Some lotaces in their months and probably whach in fact I Know from preserval observation since they are apt to be intoxicated first when going into a part. There was one who had not beech ashore half our hour at Alore Where we ful in for recomits when his voice, might be heard above all others on the din of voices and the next I saw of the had been over powered by the oritoricating beverage of Which the had freely partaken and was now on the lovel with the beasts, Roallowing in the Mine, coming the Crew there was a moulton who boasted of the 10 age of his teen but lithe Caried not fether from Bis Lize or actions been taken for more than twelve the was the fool of the mess and refron him were all Kinds of Jokes practised, When Just recovering from his attack of Lea deliness, the Complained to the Cafabain that he Could Dot Cat the salt funk but thought be Could relish a few bother 1 beans' of Course he Mas again Lent forward milti the Jeds nowhere never to Come to the Leich Compland to the Cabin, he was a great fager and being of But little use when on deen the semetimes got a whole water below that did not belong to him 4 mittant being Missed, but one oldy he had been below all the morning tratel on deck, and after Olivines the Cafatains Called him ceft and asked What he and so, he replied that he was sick, but, days the Cafatain, you were not too sick to ear a great of Beaves I didens soul lura fruit I thought even that a large Quality for a hak mans allowance, We thouthy after thoke a this bound bonne, and frut the boy abound, and as they avere out of beans the Capt gave their enough for the boy use on the passage, not mishing to slave

Farce of the guid of tobacco from for he might get be of Ose to Somebody Which however I very much doubt. I was quite anused one day! after one had frust frushed our breakfast, all the following incident, the Captain ordered one man tot thing a shovel and another a hundspille aft, and thentold the mate to Call ale hands, for What I Could, Well maagnie hor they cithen; When they had laken Their stands Sol they Could Lee this operations advantageously, the Capsain told the man with the hand sprike to pry in grider tobaces which was laying whom the quarter sleet wito the Shovel, Ithis Rooked Dol Didientons that all hands gave vent to their visibilities and for a long time they were mable to restire their Jeather to their browted positions, I think this has had the desured effect, as during the remainder of my stay one board I dur molocoasin to have The faste repealed, is is contended to make the person who has less the gullof thacker to printe the shovel but he Could hot he found, though it on this Case made no difference. I had always felt a great Curiosity Bot only to see a thine Whale but to see the marines of proceeding from The Cine the Man at the mast head should ling out, There Blives" smith the monster Mould be Converted crito oil and on they fifteenth of fame, I had my Currosity gratified, Es the Mere Letting at breakfast, the Moan whose mast head ist was Dung out there blows" and the Captain all lager to get a whale along side tacked over his Chair and had the lable that been lashed to the floor Anight have carred What Muth him, as soon as the gomes the leck, he origined. Where away Here points on the reather bow Ris Ding and livery times Days the Captain, and

fase of oil as foun as the man had sung out twice More, he gave the order to the man at the Wheel to lux and in the same breath to the Man at the Mass head to Ling out When the Ship headed for them, fleady lay he, Steady Days the Capitain Steady his 16 Days the Man at the Frheel, and Captains Calls for his glass and goes who to the factoprous Cross 1 trees and remained but a moment before he Ou is satisfied that they eve Strerin Whales, and gives the order to Troist and Living, and all 1 hands are lager to have a sight of the whale, having heard to many Dailors yours about Their, Som The boat one mil the water and their Creis have their heads felled with all ball of cdear as to the 8 lige or appearance of the great Leviathan Which 10 they we about to Challengle, they some until the 10 Boat become a mere speak send soon the this 1 Meefrer Metho More Comes in master for the time X being and Who has taken this Station at the Min mubst (head Lings out to the that the Captains boat is fact, and shortly after taking a glass I Could a Ce the Charles Couter fly as the Whale low on this flum, it tras a salroot of whales that They braid found and When they got through out 4 Other, they had turned ruf faile land Stend two er three off Sporting thick blood, at one valock the boats returned to the this braving in tow four one of the five having Quant lifter he Mais maifed, What Exclosived I'do you Call those large they told one not for it was not always Dorge Orhales Were Journed in a school, but mere is hot to busy times mith them. and have told thehe of an instance for at a boarding school the had a fat by who secured the mellmanie of Whale, which Was was Considered so good a foke that after

Inastes he left the Lahool is gras applied to another but Mot Aprile Do froitly as the first. The Whales Were fluked and the faitting falls properly Decured to the mainman head and Soon the men might We heard Linging at the Fridlass as they here heaving in the Blubbert, during the time menterous Market might be been, making sallies repose the whale, and ordaning those on the Stages Brould give some of them a slight Cur reprobe their hose, When they bould soon them up, it being the Sures May of Milling them, but on one occasion I saw one sound the Ship with a Cut alsoss his hose the Whole Wedth of the Spade not Deemingly to Care for it, to see them sound the Whale the World be led to believe that they are a very Slowfish, but to see them turn over lipon their back and they Which they have to do to bite authing thespon is Surfriged at the astonishing rapidate thick they obtain their food, but I believe the motances are not frequent but I have been told their the Man whose buerboard it is finetimes gets in Closer proximity with these fellows than render the ar-Counstance is at all times pleasant, the Mate Showed me die leg which a few years before hado been body bitten by one of them. after the Whale had been but oil and thrown down in the Blubbles soon the Carcus was Cut a drift to furnish food Not only for the Sharks and other fish, but birds are been sound it, and where ever a bird is Dien Called the Sperm Whale bird it is generally expected that the whale will be found, lever there The foot them le saw a wind which Afine David they Mnew Mas the Same intentical bud Aux ofton What Atties based the Edentity of Could not del, all was more life and animation throughous the Ship, Some were in the Blubber soon standing the Cutting the Blubber outo long Manow preces Callebullarly

Minown to Sailors as herse faceles. Bliston, Some Were getting the fires ready under the pots, some were minding the blutter so that the oil Might the more easily be lytracted, cell there busy, When the boiling Commences a Broxins Valor rises from the pott and being unwell and Sealick nearly all the trail that I was on board the Ship! Could not stay whom deek at these time but a thirthing When this part of the operations is going on at highly the men the wife the fire occasionally and the plane from the burning & craps soll refe through the Phinney and sometimed walf as high as the Manimass in one Column, there have been instances of merchant this Ourning out of their Course, to pender aid as they thought to the thirming thip, that flames Can be Leen a long distance light on love decasion the day after me hattheen boiling Obrough the Orighs, a Shiplater Spoke no and Laid they Lelw the fire as far as fifteen miles off, how That the Whales are to mumerous and frequent the Leveral oceans at all times of the year Merchants down become accustomed to this eight. after the oil is hot enough it is baken out of Wailed out the pots into a Cooler and after Standing there an horas or two is put onto Casko Which are less upon deap until the oil is quite Cool and then they are drove and stone below. it is Certainly a very excelling life, and is full of hardships and changers. I have heard found seen Lome instances Whele the this is not properly fitted served lo for as Luitable provisions are Concerned and do they not receive a good returns always fund come one to Vame, I do not believe it is the best tray for the muster of a Chip to belome Junilian with the Com for not only does familiants breed Contemps, but the would lose his Commanded over thow, but he Hunds be Duffilied With the means and be instructed ven frankindary to guie there to the men that they May the leftenter be enduced to Exclaim with

15 ced water Byron, though the strained mast should grives as de seed, and the sent Canvass fluttering thew the Gale, Still Must I on! In a Copew there Mile always be found some Who Cannot bear good treatment, but as a general thing Ad Crew should de used Well, though Some Master think and have beard them day, that they have got a voyage alone, this of Course is not true, for he Could not be at the mast head and there have been Cases where the master has been more Levere than the Case demanded to this crew, that when some of them have gone aloft they have not Dung out for Whales, he may have Killed all the fish but Someone Must have got him to There. our mate, mas very bad almost troper but that Tras not the owners fault for the Spoke Deveal besselo who Donade the Jame Complaint, When a Cash loas got wh on deat could the bring laken out me bould Smell is all over the Ship, and is was very black though all the Cashs had been vented, bund to med who was Continually Complaning of house, caused by the motion of the Wessel Forverer to Slight it Was Morst than Caking a dose of the most offensive medecine to be hamed, day of my expensive on thepboard, and though Voniting roften, I Could freserie no bile Come from from Stornach, I tried ever Method to frid belief that I had ever Meard of but to no hunfrose, even the Horne of rather the Which my Physician had given firmed of no avail, and Il then tried Some lemon Which I had brought With and they for a time as long as they lasted, for out of a humber another on board I saved Tout three or four gave the peace, I found them Brandy good too but I wired has alcommend is Where a person is given to severe Costiveness.

Touler fase I had an opportunity of Deling how Lactors faced When Coming off of a flore veryage about the middle of fine push before the breds fast as the Smoke was rising from this fire ander our feres face of oil, the man at the mast head lung out for be Ship on the weather Bene Boiling Which was running gleven to speak and, and at theren solock the Coplain of the Ship Mollin Currel abourd, I had never met himself but loken one Grot only Meets one of his Country men but Coursener it does not require a very long time to get mell enough alghanited to be schange the fital of gorsile to this great Joy ore told him the fries of bil Whier has tele cents of more than be antichated, and at once I Could bee a change hi his Countenance for the better, for he had been fretting about the success he had had of Which I alkered him withe morning, band wired w/ like a man to my al-Cusation, this olay he gomesed with as but on the next the Coldain and myself hent on board his this to the and Ruch a meal, the flow was musty, the butter bad no Coffeen tea to be had the water greacy having been furtin oil Casks, cond to brul great Juma and Cook-Roadhes of Whield I had formed a great dislike from their Many Midnight Gallies upon their victims now Oycelding to fatigue there in a Semiseferous State, afted as they advanced to me et Leemed in one boled Mhalant, I look my feer from the floor and tried to assumed the position in my Chair that a Cheriese Mandain Wereld When Imolling his hipe that of Cross legged they laughed bot me and the Capitain tolk The What they did not how throbbe Their, for he had laugho then better, liven time the trade Minade their apperance on his state ocom he

Coeproaches Chrild take a lowel and drive their until at last funding the engagement to hot a me they had left altogether, and Mow they never forget to go by his bloor southand xralkary instead of Entering as before, and of the truth of this I had din opportunity to fredge, for as soon as came mithing Close proximity of his state down they trould greaten their face and Som desapplant, now one Can hardly bland Cunother for not Traving a very great fandy for these Bugs, when he Minow that they have been Timour to bose suto chory and are fond lating under ones Chails, there seems to be Semething very singula about them, for they towned Some placen bery much, and others Mile Blesh quelth Mitto a besth full and not receive a lingle bete, the third mate of our Chip told me that on his first voyage the caught one of and pulled his mings of that he Might Work leave his Julmises and he Kept With their for four months and here offered to beto their , they go from one this to another when at lea lithest by flying or Livining at both of Which they are well expert. I thank am offertunity While out board of Eating fish balls made from the meat of the Vorpoise and at the thought of lating Which I at first turned up the more, but after taking them I expressed lang Satisfalgo amis when ever appette for fresh fish is rather Meen, it is livest but rather day as are all deep trates fish and at times the lating of it is attended with Great wish, for they Juguently Luck the Copper of a Philo which orgues poison into them and wholever luts them When ni that State reline an injurious effect from theres and I think I have before told that in Some instances death has ensued, the

Gusis account of navigations dates of when Albical and Follphin are wetty good but like the Stipfact are dry, the latter love had ho opportunity of lasting for there seemed to be a Certain Jahalif Connected With over gettyone on board, for We get times When they Julie Jollowing the Philo, Mould drop a book over with a fuese of white Cloth and No Looner trad it touched the Water, than Mit the capidity of lightning the Deizedithand When fast to the line, The Work prould break or they would Strike against the Otens bout While Coming of and drop off, se fastened to Leveral with the Grains but in every Instances they fined too lunge for the Just, The Houger I remained on board the Ohne I was confulsed with the ophnier of the deep melebrainess of the world to the failer, and I think with Horace, and is Mas a fine Sentiment, "The heart of that man must helds have been bound with oak and triple brass, who first Committed his frail Back to the lempestions Dea", Sohat a landable buterprize mas that When the marrier stepped his foot on board his Bank to try the goodness of her whom the vaging and undentrolable blements, engerernable Lave When their Creator Mall Say to them, and Cohose boice they at once obey the they live to anyon peace be still, what much have the feeling Of those men as they filled away and for the Geres think the Helsmonden finds hishaely Called to use great thier, or else by one heaving of the Boson of the ocean sound the lenterprize, Which Might frame of an incalculable benefit to manthing, Mughs be buried beneath the Hours, what a transmiguia-Cation must this have been to the Lailor When he less this raft and lande which he only they doesed explue the river with and Sail from Bank buth fellings full of fear and tremaking less at an untimbly
